

**EURO ASIA
TRADING PVT. LTD**
Your Reliable Partner

EURO ASIA TRADING PVT. LTD IS A PART OF PSD/SK - PRO GROUP

Euro Asia Trading Pvt Ltd. is a part of PSD/SK-PRO Group with headquarter in Bulgaria. Established by 3 different Cultural Background, Multi Continental and Experience People, we are a leading international supplier of raw materials, additives and concentrates used in Animal Feed. Directly working with world class manufactures to end customers, we make every endeavour to meet all the requirements in terms of quality.

Headquarters : Bulgaria .

Contact Office : Cyprus

Warehouse : Netherlands
Vietnam
Nepal

ANIMAL PROTEINS

MEAT AND BONE MEAL

Meat and Bone Meal is a source of biotic value protein, essential amino acids and necessary mineral and microelement. It improves smell, taste and texture of feed. We provide Porcine, Bovine and Mix MBM or from Pet Grade to Feed Grade quality for your demands.

Product Commercialization:

25kg bags/50kg bags/In bulk

Technical specification

Protein – **45% - 55%**

Pepsin – **83% min**

Ash – **34% max**

Fat – **13% max**

Moisture – **6% max**

ANIMAL PROTEINS

BLOOD MEAL

Containing mainly high digestible protein and essential amino acids, Blood Meal presents as effective ingredient providing a better cost-benefit products.

Product Commercialization:

25kg bags/50kg bags/Big bags

Technical specification

Protein – **90%** min

Pepsin – **90%** min

Ash – **2%** max

Moisture – **6%** max

ANIMAL PROTEINS

HYDROLYZED FEATHER MEAL

Hydrolyzed Feather Meal is a source of natural protein for most livestock and can be used to replace a significant portion of other protein sources in formula of feed.

Product Commercialization:

25kg bags/50kg bags/Big bags

Technical specification

Protein – **80%** min

Pepsin – **70%** min

Ash – **4%** max

Fat – **13%** max

Moisture – **8%** max

ANIMAL PROTEINS

POULTRY MEAL

Poultry Meal was originated from digestible protein, essential amino acids and mineral matter. It improves smell, taste and texture of feeds, making them more palatable to animal.

Product Commercialization:

25kg bags/50kg bags/Big bags

Technical specification

Protein – **55% - 70%**

Pepsin – **85%** min

Ash – **18%** max

Fat – **13%** max

Moisture – **6%** max

ANIMAL PROTEINS

FISH MEAL

Originated from highly digestible protein, amino acids, unsaturated fatty acids and minerals ideal for complete diets, Fish Meal also serves as a supply of essential omega-3 fatty acids, which make finished products so valuable.

Product Commercialization:

25kg bags/50kg bags/ in bulk

Technical specification

Protein – **55 % - 65 %**

Pepsin – **90 % min**

Ash – **30 % max**

Fat – **14 % max**

Moisture – **6 % max**

PLANT PROTEINS

DDGS - DISTILLERS DRIED SRAIS WITH SOLUBLES

Distiller's Dried Grains with Soluble (DDGS) are the nutrient rich co-product of dry-milled ethanol production. Its utilization as a feed ingredient is well documented as both an energy and a protein supplement.

Product Commercialization:

25kg bags/50kg bags/ in bulk

Technical specification

Protein	27.0%
Fiber	7.0%
Fat	10.0%
TME _n	2,829 kcal/kg
Lysine	0.79%
Lysine availability	81%
Lysine as a % of CP	2.9%
Phosphorus	0.77%
P bioavailability	60%

PLANT PROTEINS

CGM-CORN GLUTEN MEAL

Corn Gluten Meal, a by-product of the manufacture of maize starch, is a very palatable ingredient containing high protein content, so it performs well in animals' diets.

Product Commercialization:

25kg bags/50kg bags/ in bulk

Technical specification

Appearance – Light yellow powder

Assay (as Protein) \geq **60%**

Fat \leq **3.0%**

Moisture \leq **10.0%**

Ash \leq **3.0%**

ADDITIVES

CHOLINE CHLORIDE

Choline (commonly in the form of Choline Chloride) is one of the B categories of vitamin. It is acetylcholine in the biological organization. It is the components of lecithin and nerve acid fat. It is used by most animals as a precursor of acetyl choline, which influences the transmission of impulses from nerves to muscles. It is also used as a source of methyl groups. In feed, the content of natural choline chloride is limited. It can not satisfy complete demand for the animal growing. Therefore, choline chloride is widely used as feed additive at home and abroad. It will stimulate the animal or poultry's growth, put on their weight rapidly and boost up the body's immunity function. It has prominence effects on improving the quality and quantity of eggs and meat. On the contrary, shortage of choline may cause liver diseases, retarded growth, perosis, reduced egg-laying rate and increased mortality.

Product Commercialization:

25kg bags

Technical specification

Choline Chloride - **50%** - **60%**

MYCOTOXIN BINDER

Premixture of binding agents against mycotoxins for all animals (Feed and Ingredient additive) with ingredients included hydrated sodium calcium Aluminosilicates (E554&E558 under EU Regulation). Use 0,7to 3 kilos per ton of feed depending on the level of contamination.

Product Commercialization:

25kg bags

Technical specification

SiO ₂ - 60.8%	K ₂ O - 0.9%
AL ₂ O ₃ - 20.27%	CaO - 2.0%
Fe ₂ O ₃ - 9.3%	TiO - 0.68%
MgO - 2.6%	Na ₂ O - 1.1%

ADDITIVES

DCP

Feed Grade Dicalcium Phosphate reach high unit value with high available phosphorus (P) content (healthy bones, skeleton, excellent metabolism, energy supply, eggshell and productivity).

Product Commercialization:

25kg bags

Technical specification

Main technical characteristic:

Typical

Total Phosphorus (P)	18.0% ($\sigma = 0.25$)
Relative Solubility of (P) in Citric Acid (2%)	90 - 99%
Calcium (Ca)	24 - 25%
Humidity	2.0% (max)
Particle size	80% 0.25-1.80mm, 20% < 0.25mm

Undesirable elements:

Fluorine (F)	2000 ppm (max)
Lead (Pb)	15 ppm (max)
Cadmium (Cd)	10 ppm (max)
Arsenic (As)	10 ppm (max)
Mercury (Hg)	0.1 ppm (max)
Packaging	25 kg/ 1150 kg/ 1200 kg bags
Shelf life (in original package)	3 years from production

MCP

Monocalcium Phosphate reach high unit value with high available phosphorus (P) content (healthy bones, skeleton, excellent metabolism, energy supply, eggshell and productivity).

Product Commercialization:

25kg bags

Technical specification

Main technical characteristic:

Typical

Total Phosphorus (P)	22.7% ($\sigma = 0.25$)
Relative Solubility of (P) in Citric Acid (2%)	90 - 99%
Relative Solubility of (P) in water	80%
Calcium (Ca)	16-17%
Particle size	0.25mm < 90% < 1.80mm

Undesirable elements:

Fluorine (F)	2000 ppm (max)
Lead (Pb)	15 ppm (max)
Cadmium (Cd)	10 ppm (max)
Arsenic (As)	10 ppm (max)
Mercury (Hg)	0.1 ppm (max)
Packaging	25 kg/ 1150 kg/ 1200 kg bags
Shelf life (in original package)	3 years from production

ANIMAL FAT

POULTRY FAT

Poultry oil increases the feeds energy density with valuable fatty acid profile, especially, linoleic acid content. It improves smell, taste and texture of feeds, making them more palatable to animal. Same time vegetable oils with poor performance in Linoleic acid (low as 10-12%) can't give those benefits.

Product Commercialization:

In tank

Technical specification

Typical Analytics

Free fatty acids	2.55%
Moisture	0.23%
Peroxide Value	< 5meq/1000g
Impurity	free
Melting point/ Freezing point	35°F

Fatty Acid Profile

Myristic acid	1.2
Palmitic acid	19.0
Stearic acid	6.9
Oleic acid	33.0

Linoleic acid	22,0
Linolenic acid	1.9
Arachidonic acid	0.5
Eicosapentanoic acid	< 0.1
Docosahexanoic acid	<0.1

Consulting & Logistics

We are providing consulting services to the Feed millers with international experts and best logistics services with well - known logistics companies.
